Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

Claims 17, 21 and 24 are allowed. The prior art discloses a method for transmitting data packets over a channel having compressed headers that transmit number of consecutive update packets and further determining the channel quality and then transmitting based on the determined channel quality.

The prior art however fails to disclose or suggest transmitting a sequence of subsequences of data packets where each subsequence includes a number of consecutive update packets and further setting the first subsequence according to a determined channel quality and then subsequently decreasing by a predetermined number the number of update packets in subsequences following the first subsequence.

Claims 18, 20 and 22 are allowed. The prior art discloses an apparatus for transmitting data packets over a channel having compressed headers using a context that transmit number of consecutive update packets and further determining the channel quality and then transmitting based on the determined channel quality. The prior art further discloses the calculation of roundtrip delay between transmitter and receiver as appropriate.

The prior art however fails to disclose or suggest transmitting a sequence of a number of packets comprising a number of update packets, which update said context, and a number of non-update packets, which do not update said context and then further setting the number of update packets and non-update packets in said sequence according to the determined round trip delay.

Art Unit: 2664

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
